

OCEANLIGHT 400

The OceanLight 400 is a highly robust underwater LED light for aquaculture. The OceanLight is made of a robust aluminium cylinder that is sealed with a neoprene rubber top. The LEDs are state of the art high power high endurance diodes with precise wavelengths. It operates with a broad range of power supplies and can even run on a DC power supply.

THE FEATURES

- » Optimized light spectrum
- » True softstart from "real dark"
- » 45% more light in blue-green part of spectrum
- » Comparable light output with 1000W HID 4K
- » 120° light beam all-round
- » Adjustable consumption 10-100%
- » Cable to be used as suspension
- » Erosion protective zinc ring

THE CAPACITY

- ☑ Voltage: 100-240V
- ☑ Consumption: 400W
- ☑ Max depth: 20 m
- ☑ Light colour: 5K
- ☑ Cable: 3G2,5mm²
- ☑ Cable length: 40m (standard)
- ☑ Weight: 6,5 kg
- ☑ Lifespan: 70.000 hours
- ☑ Warranty: 2 years from shipment date
- ☑ Electrical approvals: CE, RoHS
